## CYANIDE ZINC PLATING PROCESSES

**GALVANOPOWER 725** Economical process for the rack and barrel cyanide zinc plating. Produces brilliant ductile deposits.

**GALVANOPOWER 726** High cyanide rack & barrel zinc plating process. Economical to use .

**GALVANOPOWER 727** Outstanding process for low cyanide zinc plating electrolytes. Produces, highly brilliant layers. Good stability at high temperature. Very low consumption.

**GALVANOPOWER 720** A unique purifier formulation for cyanide zinc plating electrolytes.
